-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-5, 7, 8, 10, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meadows et al Patent Application Publication 2002/0082775.

Meadows discloses all of the instant application but does not specifically limit the points of data that a user can download into a GPS enable PDA to the front of the hole greens and the middle of the Hole greens or specifically state the use of a cradle. Meadows does disclose in figures 18-24 that the player can have a measurement to the middle and front of the hole greens along with other measurement (see also paragraphs 42-45). With respect to the survey of the golf course by the player or anybody else please see paragraphs 49-51. With respect to data exchange please see paragraphs 189-191 where it is taught that information is wirelessly beamed to the PDA. It is well known that data and programs can be transferred to and from a PDA by the use of a cradle and as disclosed above wirelessly. See any PALM PILOT that has a docking station. While Meadows discloses multiple points that could be entered and viewed with relation to ball distance the structure for only having the limitations of the front and the middle of the hole greens which are on or can be would be obvious to not include other point and only include player desired points since the structure for doing so is known.

Citation of Pertinent Prior Art

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are related to hand held device with gps used for golf; Woo '677, Brunk '787, Johnson '496, Hirooka '750.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M Hotaling II whose telephone number is 703 305 0780. The examiner can normally be reached on Mon-Thurs 7:30-6.
